

Rainfall Event on August 31st 2024

We would like to extend our sincere thanks to members of our local CoCoRaHs volunteer community that continue to collect essential and invaluable rain data across the Bahamas.

Below are the rainfall totals collected this morning, with highlighted gauge readings indicating catches in excess of 4 inches of rainfall in 24 hours. Putting it into perspective, the climatological average rainfall totals for the month of August is 8.31 inches, indicating that quite a few areas got a month of rainfall in less than 12 hours!

Highest rainfall catch recorded was in Lyford Cay, with 9.81 inches collected within a 24 hour period. Highest rainfall catch total in the Family Islands was documented in Georgetown Exuma, with 8.33 inches.

If you are interested in becoming a CoCoRaHs Observer, you can submit an application at <https://www.cocorahs.org/bahamasapplication.aspx> , or email us at meteo@batelnet.bs or bahamas.forecast.office@gmail.com
