

BAHAMAS PUBLIC FORECAST

BAHAMAS PUBLIC FORECAST FOR THIS AFTERNOON AND TONIGHT AND THE NEXT SIX (6) DAYS, ISSUED BY THE BAHAMAS DEPARTMENT OF METEOROLOGY AT 12:00 P.M. EDT, SATURDAY, JUNE 6, 2026. THE NEXT SCHEDULED FORECAST WILL BE ISSUED AT 6:00 P.M. EDT.

WARNING IN EFFECT:

*A **Severe Weather Watch** remains in effect for the Southeast Bahamas and the Turks and Caicos Islands. The public is urged to remain updated on all severe weather warnings issued by the Bahamas Department of Meteorology.*

A dissipating frontal boundary combined with a surface trough, streaming tropical moisture and an upper level disturbance, continues to support showers and thunderstorms across portions of the Central and Southeast Bahamas through Sunday. The Northern islands remain in a dry weather pattern with more stable conditions, while the Northwestern islands could experience a few isolated passing showers.

GENERAL SITUATION:

***Outlook:** On Sunday, the remnants of the frontal boundary are expected to dissipate, while a trough across the Southeastern Bahamas gradually shifts northwestward, transporting moisture into additional areas of the archipelago. Most of the thunderstorm activity and cloud cover will remain concentrated across the Central and Southeast Bahamas, while a dry air mass continues to support relatively stable weather conditions over the Northern Bahamas through midweek. By late Wednesday, the trailing end of another frontal boundary may approach the region as a tropical wave passes south of the island chain. The interaction of these features could lead to an increase in shower and thunderstorm activity through the latter part of next week.*

SPECIAL WEATHER NOTES:

Flooding:** There is a **moderate** risk of excessive flooding over portions of the **Central and the Southeast Bahamas** during heavy and prolonged rainfall events. **Residents should monitor conditions and are urged to exercise caution when traversing in low-lying, flood-prone and urban areas during such events.

Rip Currents:** There is a **slight to moderate** risk of rip currents affecting all Atlantic exposures of the Bahamas. **Beachgoers and swimmers are urged to exercise caution.
