

## BAHAMAS MARINE FORECAST

MARINE FORECASTS FOR THE BAHAMAS ISSUED BY THE BAHAMAS DEPARTMENT OF METEOROLOGY AT 12:00 P.M. EST TUESDAY, JUNE 16<sup>TH</sup>, 2026, FOR THE NEXT 24 HOURS. THE NEXT SCHEDULED FORECASTS WILL BE ISSUED AT 6:00 P.M. EDT.

**SPECIAL WARNINGS:** The **New Moon phase** will affect tidal ranges, which means **stronger tidal currents**, especially in or around waterways. Also, during low tides, shoals, dunes, and banks will be partially covered due to the phase, and the risk of running aground is much higher...  
**SEE HEAT ADVISORY BELOW:**

### COASTAL CONDITIONS-

**Atlantic exposed-** Minor during high tide

### RIP CURRENTS:

**North, Northwest & Central Bahamas: Low rip current risk** — Swimmers should remain vigilant.

**Southeast Bahamas: Moderate rip current risk**

**WARNING:** MARINE CONDITIONS:

### Atlantic exposed:

- **Southeast Bahamas:** Small craft should exercise caution.
- **Remaining Country:** None

### Open Waters, Nearshore & Sheltered:

- **Southeast Bahamas:** Small craft should exercise caution.
- **Remaining Country:** None

**GENERAL SITUATION:**

No significant changes are expected in the weather pattern, as ridging remains established from the surface through the mid-levels, while a weak upper-level trough persists aloft. Marine conditions will remain generally favorable across the waters from the Little Bahama Bank to the northern Great Bahama Bank. However, seas across the Southeast Bahamas will be locally choppy, becoming rough in Atlantic-exposed areas. This pattern is expected to persist through the remainder of the week and into the weekend.

**OUTLOOK:**

### **Outlook**

**Wednesday & Thursday:** The weather pattern remains largely unchanged, with ridging maintaining control from the surface through the mid-levels, while a weak upper-level trough persists over the region. Daytime heating combined with sea-breeze convergence will generate enough moisture and instability to trigger isolated showers and thunderstorms during the afternoon hours.

### NORTHERN BAHAMAS

(INCLUDING GRAND BAHAMA, ABACO, BIMINI & ADJACENT WATERS):

**ADVISORY:** *None...outside of any thunderstorm activity...*

**WINDS:** South to southwest 10 to 15 knots today becoming southeast to south 10 knots tonight...

**LOCAL SEAS:** All areas- less than 2 feet; the Atlantic exposed waters- 3 to 4 feet.

**GULF STREAM:** Less than 2 feet

**SWELLS:** Light east-southeast for the Atlantic exposed

**WEATHER:** Mostly to partly sunny with the slight chance for isolated showers and possible thunderstorms.

### NORTHWEST BAHAMAS

(INCLUDING NEW PROVIDENCE, ANDROS, THE BERRY ISLANDS, ELEUTHERA & ADJACENT WATERS):

**ADVISORY:** *None...outside of any thunderstorm activity...*

**WINDS:** Southeast 10 knots today becoming east to southeast tonight...

**LOCAL SEAS:** All areas- less than 2 feet; the Atlantic exposed waters- 3 to 4 feet.

**SWELLS:** Light east-southeast for the Atlantic exposed

**WEATHER:** Mostly to partly sunny with the slight chance for isolated showers and possible thunderstorms.

**CENTRAL BAHAMAS**  
(INCLUDING EXUMA, CAT ISLAND, LONG ISLAND, SAN SALVADOR, RUM CAY & ADJACENT WATERS):

**ADVISORY:** *None...outside of any thunderstorm activity...*  
**WINDS:** East to southeast 10 to 15 knots today becoming 15 knots tonight with higher gusts...  
**LOCAL SEAS:** All areas- less than 2 feet; Crooked Island passage- 2 to 3 feet; the Atlantic exposed waters- 3 to 4 feet.  
**SWELLS:** Light east-southeast for the Atlantic exposed  
**WEATHER:** Mostly to partly sunny with the slight chance for isolated showers and possible thunderstorms

**SOUTHEAST BAHAMAS**  
(INCLUDING INAGUA, ACKLINS, CROOKED ISLAND, MAYAGUANA, RAGGED ISLAND & ADJACENT WATERS):

**ADVISORY:** *Small craft should exercise caution...Winds and seas will be higher due to thunderstorm activity.*  
**WINDS:** East 15 knots today becoming 15 to 20 knots with gusts knots tonight...  
**LOCAL SEAS:** Sheltered areas- 1 to 3 feet; open waters & all passages- 3 to 4 feet; the Atlantic exposed waters- 4 to 5 feet.  
**SWELLS:** Light to moderate east of open waters; moderate east-southeast for the Atlantic exposed  
**WEATHER:** Partly to mostly cloudy with the chance for isolated showers and possible thunderstorms.

**TROPICAL WEATHER OUTLOOK:**

**Official Hurricane Season:** June 1 – November 30, 2025.  
**1. Northwestern Gulf of America (AL90):**  
 A broad area of low pressure located inland over south Texas is producing a large area of disorganized showers and thunderstorms. The system is forecast to move northeastward along the Texas coast and could emerge over the northwestern Gulf of America later today or tonight. Environmental conditions are expected to be marginally conducive for the formation of a short-lived tropical storm late today or on Wednesday, especially if the system moves far enough offshore.  
 Elsewhere, the tropical is quiet and tropical cyclone formation is not expected for the next 7 days.

**EXTENDED FORECAST FOR THE BAHAMAS FOR WEDNESDAY, JUNE 17<sup>TH</sup>, 2026:**

**ADVISORY:** **Entire Bahamas:** Light risk for thunderstorm activity  
**North Bahamas-** South 10 knots becoming southeast 10 to 15 knots overnight.  
**Northwest & Central Bahamas –** Southeast 10 to 15 knots becoming east to southeast 10 to 15 knots overnight.  
**Southeast Bahamas -** East 15 knots becoming 15 to 20 knots overnight with higher gusts

**WINDS:**

**SEAS:** **North, Northwest to Central Bahamas –** All areas less than 2 feet; Northeast Providence Channel, Exuma Sound & Crooked Island- 3 feet; Atlantic exposed waters–3 to 4 feet  
**Southeast Bahamas –** Sheltered areas- 1 to 3 feet; open waters & all passage- 3 to 4 feet; and the Atlantic exposed waters–4 to 5 feet

**SWELLS:** **Entire Bahamas:** Light to moderate east-southeast swells for the Atlantic waters.  
**Southeast Bahamas:** Light east swells for the open waters.

**PRECIPITATION:** **Northwest & Central Bahamas:** Moderate risk for showers and thunderstorms...  
**Remaining Bahamas:** Low risk for the showers and possible thunderstorms.

**EXTENDED FORECAST FOR THE BAHAMAS FOR THURSDAY, JUNE 18<sup>TH</sup>, 2026:**

**ADVISORY:** Entire Bahamas: Light risk for thunderstorm activity

**WINDS:** North Bahamas- South 10 knots becoming southeast 10 to 15 knots overnight.  
Northwest & Central Bahamas – Southeast 10 to 15 knots becoming east to southeast 10 to 15 knots overnight.  
Southeast Bahamas - East 15 knots becoming 15 to 20 knots overnight with higher gusts

**SEAS:** North, Northwest to Central Bahamas – Sheltered areas & Gulf Stream- less than 2 feet;  
Northeast Providence Channel, Exuma Sound – 2 to 3 feet; Crooked Island & Atlantic exposed waters–3 to 4 feet  
Southeast Bahamas – Sheltered areas- 2 to 3 feet; open waters & all passage- 3 to 4 feet; and the Atlantic exposed waters- 4 to 5 feet

**SWELLS:** Entire Bahamas: Light to moderate east-southeast swells for the Atlantic waters.  
Southeast Bahamas: Light east swells for the open waters.

**PRECIPITATION:** Entire Bahamas: Low risk for the showers and possible thunderstorms.

The survey will take only a moment of your time to complete and your input will directly contribute to enhancing our services. Thank you!

**HEAT HEALTH BULLETIN**

UPDATED: 15TH JUNE 2026

**REGION AFFECTED**

The Northern and Northwest Bahamas are currently experiencing an **EXCESSIVE Heat Wave**.

Expect the Heat Index to be between 102° - 110°F in **New Providence, Grand Bahama, Abaco, Bimini, The Berry Islands, Andros and Eleuthera**.

*Note:* The heat index is not the actual temperature, it is how the body will interpret the temperature.

**HEAT METER**

**MOST VULNERABLE GROUPS**

- Persons on prescription medications
- Displaced Individuals
- Pregnant
- Elderly
- Children
- Pets

**RECOMMENDATIONS**

- Check on others
- Consult Doctor if unwell
- Stay Hydrated
- Protect yourself from The heat
