

## BAHAMAS PUBLIC FORECAST

**BAHAMAS PUBLIC FORECAST FOR THIS AFTERNOON AND TONIGHT AND THE NEXT SIX (6) DAYS, ISSUED BY THE BAHAMAS DEPARTMENT OF METEOROLOGY AT 12:00 P.M. EDT, TUESDAY, MARCH 24, 2026. THE NEXT SCHEDULED FORECAST WILL BE ISSUED AT 6:00 P.M. EDT.**

<b>WARNING IN EFFECT:</b>	<i>There are no public warnings in effect at this time. For additional marine information, please view our marine forecast at our website, <a href="http://met.gov.bs">met.gov.bs</a>.</i>
<b>GENERAL SITUATION:</b>	<p>Weak high pressure will continue to dominate across the area today, maintaining stable and fair conditions, with light to moderate breezes persisting through tonight.</p> <p><b>Outlook:</b> This pattern will remain across the area through midweek producing mostly stable weather. Wednesday, a weak frontal boundary is forecast to stall just north of the Northern Bahamas increasing the chance of shower activity over that area. On Thursday low-level troughing, combined with an influx of moisture, will contribute to enhanced shower activity across the Central and Southeastern Bahamas. Sunday, another frontal boundary is expected to move into the Northern islands accompanied by very strong to gale force winds and hazardous boating and beaching weather.</p>
<b>SPECIAL WEATHER NOTES:</b>	<p><b>Rip Currents:</b> There remains a <b>moderate</b> of rip currents for the Atlantic waters. <i>Swimmers in these areas are urged to exercise caution.</i></p> <p><b>UV Index:</b> Due to the UV index being in the <b>high to very high range</b>, <i>the public is urged to wear sunglasses, sun screen, wide brimmed hats and suitable clothing in the event of prolonged exposure during peak daylight hours (10am – 3pm).</i></p>

NORTHERN BAHAMAS (INCLUDING GRAND BAHAMA, ABACO, BIMINI & ADJACENT WATERS):
