

## BAHAMAS PUBLIC FORECAST

BAHAMAS PUBLIC FORECAST FOR THIS AFTERNOON AND TONIGHT AND THE NEXT SIX (6) DAYS, ISSUED BY THE BAHAMAS DEPARTMENT OF METEOROLOGY AT 12:00 P.M. EDT, WEDNESDAY, MARCH 25, 2026. THE NEXT SCHEDULED FORECAST WILL BE ISSUED AT 6:00 P.M. EDT.

<b>WARNING IN EFFECT:</b>	<i>There are no public warnings in effect at this time. For additional marine information, please view our marine forecast at our website, met.gov.bs.</i>
<b>GENERAL SITUATION:</b>	<p>Weak ridging will maintain mostly stable and dry conditions across much of the island chain this afternoon, as a weakening frontal boundary lingers north of the area. Meanwhile, low-level troughing to the east will support increased shower activity across the Southeast Bahamas this afternoon before extending into the Central Bahamas overnight.</p> <p><b>Outlook:</b> On Thursday, the front will remain north of the area before retreating by the evening hours. Meanwhile, an influx of moisture, along with a westerly short wave moving over the Bahamas, will contribute to higher likelihoods of thunderstorm activity through to Friday, as the surface trough pushes west of the island chain. High pressure will rebound over much of the area heading into the weekend. By Sunday, another frontal boundary is expected to move into the Northern islands accompanied by gale force winds and dangerous marine conditions.</p>
<b>SPECIAL WEATHER NOTES:</b>	<b>Rip Currents:</b> There remains a <b>moderate</b> of rip currents for the Atlantic waters. <i>Swimmers in these areas are urged to exercise caution.</i>

### NORTHERN BAHAMAS

(INCLUDING GRAND BAHAMA, ABACO, BIMINI & ADJACENT WATERS):

<b>SKY CONDITIONS:</b>	Partly sunny to sunny this afternoon, becoming fair tonight.		
<b>PRECIPITATION:</b>	10% chance of isolated showers.
