

## BAHAMAS PUBLIC FORECAST

**FORECASTS FOR THE BAHAMAS FOR TODAY, TONIGHT AND THE NEXT SIX (6) DAYS, ISSUED BY THE BAHAMAS DEPARTMENT OF METEOROLOGY AT 6:00 A.M. EDT, Thursday, March 12, 2026. THE NEXT SCHEDULED FORECAST WILL BE ISSUED AT 12:00 P.M. EDT.**

<b>WARNING IN EFFECT:</b>	<i>There are no public warnings in effect at this time. For additional marine information, please view our Marine forecast on our website, <a href="http://met.gov.bs">met.gov.bs</a>.</i>
<b>GENERAL SITUATION:</b>	<p>A warm weather pattern with some light, isolated showers will continue across The Bahamas courtesy of high pressure that is shifting northeast of the area. By late afternoon or early evening, a frontal boundary will move closer to the Northern Bahamas along with pre-frontal activity producing an increase in clouds, showers and possible thunderstorms across the Northern and Northwest Bahamas.</p> <p><b>Outlook:</b> The frontal boundary is expected to stall and gradually weaken near the Northern Bahamas through the weekend. This will support cloudy conditions as well as an elevated chance of showers over the Northern and parts of the Northwest Bahamas through the weekend. On Sunday, a tight pressure gradient will generate an increase in winds across the island chain through Monday. A mid to upper level trough in the Gulf of Mexico is anticipated to move across the Northern, Northwest and Central Bahamas producing cloudy skies, breezy to windy conditions and widespread showers and thunderstorms lasting through Thursday. This feature may enhance the risk of severe weather over the forecast area.</p>
<b>SPECIAL WEATHER NOTES:</b>	<b>Rip Currents:</b> There remains a <b>moderate</b> of rip currents for all east and southeast coastal waters in the Central & Southeast Bahamas. There is a slight risk of rip currents elsewhere across the island chain.
