

BAHAMAS PUBLIC FORECAST

FORECASTS FOR THE BAHAMAS FOR TODAY, TONIGHT AND THE NEXT SIX (6) DAYS, ISSUED BY THE BAHAMAS DEPARTMENT OF METEOROLOGY AT 6:00 A.M. EDT, Thursday, April 23, 2026. THE NEXT SCHEDULED FORECAST WILL BE ISSUED AT 12:00 P.M. EDT.

WARNING IN EFFECT:	<i>There are currently no public warnings in effect at this time. For additional marine information, please view our marine forecast on our website, met.gov.bs.</i>
GENERAL SITUATION:	<p>High pressure ridge across the island chain will continue to support moderate to fresh breezes and cooler temperatures, while a dissipating frontal boundary south of Inagua will produce a few showers across the southern islands.</p> <p>Outlook: The front will continue to weaken and meander just south of the region while weakening high pressure supports mostly stable weather along with gentle to fresh breezes through the end of the week. Conditions will begin to change by Friday evening, as a wet weather pattern settles across parts of the Northwest, Central and Southeastern Bahamas due to low level troughing along with deep tropical moisture moving in from the Gulf. Some improvement is expected by Saturday evening as the trough exits the area into the Atlantic.</p>
SPECIAL WEATHER NOTES:	<i>There is a moderate risk of rip currents along Atlantic beaches as well as those in the Southeast Bahamas. Beachgoers should exercise extreme caution.</i>

NORTHERN BAHAMAS (INCLUDING GRAND BAHAMA, ABACO, BIMINI & ADJACENT WATERS):			
SKY CONDITIONS:	A mix of sun and clouds, partly cloudy tonight		
PRECIPITATION:	10% chance of a passing shower or two.		
WINDS:	Easterly at 10 to 15 knots.
