

## BAHAMAS PUBLIC FORECAST

**FORECASTS FOR THE BAHAMAS FOR TODAY, TONIGHT AND THE NEXT SIX (6) DAYS, ISSUED BY THE BAHAMAS DEPARTMENT OF METEOROLOGY AT 6:00 A.M. EDT, Wednesday, April 29, 2026. THE NEXT SCHEDULED FORECAST WILL BE ISSUED AT 12:00 P.M. EDT.**

<b>WARNING IN EFFECT:</b>	<i>There are no public warnings in effect at this time. For marine information, please view our marine forecast at our website, <a href="http://met.gov.bs">met.gov.bs</a>.</i>
<b>GENERAL SITUATION:</b>	<p>High pressure north of the area, will continue to support light to fresh breezes across the island chain and mostly stable, and warm temperatures. However, some light passing showers are possible due to a weakening frontal boundary just east of the Central Bahamas. That front is expected to dissipate later today.</p> <p><b>Outlook:</b> High pressure is expected to remain across the area through late Thursday or early Friday when a front will move near the Northern Bahamas producing some shower activity across that area. That frontal boundary is expected to stall just north of the area. However on Sunday, another stronger front is expected to slide into the Northern islands producing widespread showers and thunderstorms. This wet weather pattern will spread into the Northwest Bahamas through Monday, and the Central islands by Tuesday as the front moves southeastward.</p>
<b>SPECIAL WEATHER NOTES:</b>	<p><b>Rip Currents:</b> A <b>moderate</b> risk of rip currents exists along Atlantic-exposed beaches of the island chain. <b>Beachgoers are advised to exercise caution.</b></p> <p><b>Heat and UV Index:</b> The public is advised to remain hydrated, wear protective clothing and sunscreen and seek shaded areas while outside during peak sunshine hours (<b>10am – 3pm</b>), as UV indices are expected to be in the <b>high to extreme</b> range, and heat indices reach into the <b>mid 90's</b>.</p>

NORTHERN BAHAMAS (INCLUDING GRAND BAHAMA, ABACO, BIMINI & ADJACENT WATERS):			
<b>SKY CONDITIONS:</b>	Mostly sunny, fair tonight		
<b>PRECIPITATION:</b>	10 to 20% chance of showers.
