

BAHAMAS PUBLIC FORECAST

BAHAMAS PUBLIC FORECAST FOR TONIGHT AND THE NEXT SIX (6) DAYS, ISSUED BY THE BAHAMAS DEPARTMENT OF METEOROLOGY AT 6:00 P.M. EDT, Saturday, October 10, 2026. THE NEXT SCHEDULED FORECAST WILL BE ISSUED AT 6:00 A.M. EDT TOMORROW

WARNING IN EFFECT:	<i>There are no public warnings in effect at this time.</i> High pressure will continue to strengthen across the island chain, accompanied by a dry, stable air mass as most of the moisture moves away from the area. A tightening pressure gradient will support moderate to fresh breezes across the archipelago on Sunday, with generally stable weather conditions prevailing.
GENERAL SITUATION:	Outlook: By Tuesday, a frontal boundary is expected to move into the Northern Bahamas, bringing an increase in shower activity across the Northern and Northwest Bahamas. The front is forecast to stall over the Central Bahamas by Thursday, with lingering moisture along the boundary. High pressure will then build quickly behind the front, promoting mainly dry and stable conditions across the Northern and Northwest Bahamas.
SPECIAL WEATHER NOTES:	Rip Currents: There is a <i>moderate</i> risk of rip currents across all Atlantic-exposed waters as well as the eastern and southern shorelines of all islands. <i>Beachgoers and swimmers are advised to exercise caution when entering the water.</i>

NORTHERN BAHAMAS (INCLUDING GRAND BAHAMA, ABACO, BIMINI & ADJACENT WATERS):

SKY CONDITIONS:	Fair tonight, partly sunny tomorrow		
PRECIPITATION:	10 to 20% chance of isolated showers
