

BAHMET 24/10B

## BAHAMAS PUBLIC FORECAST

BAHAMAS PUBLIC FORECAST FOR TONIGHT, TOMORROW AND THE NEXT SIX (6) DAYS, ISSUED BY THE BAHAMAS DEPARTMENT OF METEOROLOGY AT 6:00 P.M. EST, Sunday, February 8, 2026. THE NEXT SCHEDULED FORECAST WILL BE ISSUED AT 6:00 A.M. EST TOMORROW.

<b>WARNING IN EFFECT:</b>	<i>There are currently no public warnings in effect at this time. For our Marine Forecast please visit our webpage @ <a href="http://met.gov.bs">met.gov.bs</a></i>
<b>GENERAL SITUATION:</b>	A dry reinforcing cold front moving through the Central Bahamas, will eventually merge with a weak front near the Southeastern islands and exit the islands late tonight. High pressure will build across the island chain behind the front supporting a dry and stable weather pattern. <b>Outlook:</b> Temperatures are expected to drop on Monday and Tuesday before slowly warming by mid to late week as high pressure continues to build. Overall, conditions are expected to remain generally quiet, with minimal weather activity for the upcoming week. Winds will stay light to moderate across the area through most of the week.
<b>SPECIAL WEATHER NOTES:</b>	<b>Low temperatures:</b> Residents are reminded to stay safe during cooler weather by taking precautions to protect themselves, pets, the elderly, and children. Dress warmly in layers and make sure children are well protected from the cold. <b>Rip Currents and Rough Surf:</b> There remains a moderate to high risk of dangerous, life-threatening rip currents and rough surf across all areas. These hazardous waves may also affect typically sheltered locations, especially along Atlantic-facing shorelines of the island chain. Beachgoers and swimmers are strongly advised to remain out of Atlantic waters at this time.

### NORTHERN BAHAMAS

(INCLUDING GRAND BAHAMA, ABACO, BIMINI & ADJACENT WATERS):
