

BAHMET 23/7A

## BAHAMAS MARINE FORECAST

MARINE FORECASTS FOR THE BAHAMAS FOR THE NEXT 24 HOURS ISSUED BY THE BAHAMAS DEPARTMENT OF METEOROLOGY AT 6:00 A.M. EST, Sunday, February 15, 2026. THE NEXT SCHEDULED FORECAST WILL BE ISSUED AT 12:00 P.M. EST.

WARNINGS:	A <b>Near Gale Warning (28–33 knots)</b> remains in effect for the <b>Southeast Bahamas</b> . Occasional gusts to near-gale force are likely across this area until NOON. <b>Boaters, especially small craft, are urged to seek safe shelter and remain in port.</b>
GENERAL SITUATION:	<p>The country is currently under the influence of a tight pressure gradient, supported by a strong Atlantic high-pressure system to the northeast and a deepening low-pressure system across the southeastern United States. The combination of these two features is generating fresh to locally strong winds and moderate to rough seas, with occasional wind gusts reaching <b>near gale</b> force, particularly across the northern and southern extremes of the archipelago. Meanwhile, low-level moisture along the western periphery of the high-pressure ridge is contributing to the development of isolated fast-moving showers across the island chain.</p> <p><b>Outlook:</b> A cold front, accompanied by scattered showers and isolated thunderstorms, is expected to enter the Northern islands on Monday. The front will quickly move through the island chain and reach the Southeastern islands by Tuesday. High pressure will build across the archipelago by mid-week, contributing once again to more stable weather conditions. Lingering swell conditions will plague the Atlantic exposures of the island chain by late Tuesday, gradually subsiding towards the end of the work week.</p>

NORTHERN BAHAMAS (INCLUDING GRAND BAHAMA, ABACO, BIMINI & ADJACENT WATERS):	
ADVISORY:	<b>Small craft advisory for ALL area waters. Small craft operators are urged TO seek safe harbor and remain in port. Near Gale Warning possible by NOON.</b>
WINDS:	Southeast to south at 15 – 20 knots with occasional higher gusts, increasing 15 to 25 knots with occasional gusts to <b>near gale</b> force by nightfall.
LOCAL SEAS:	3 – 5 feet nearshore and among sheltered areas, building up to 7 feet in offshore and Atlantic waters.
GULF STREAM:	4 – 6 feet, building 5 to 8 feet by evening; moderate to large southeast to south swell.
SWELLS:	Moderate mixed swell on Atlantic waters.
WEATHER:	10 - 20% chance of an isolated shower or two this morning, increasing to a 20 – 30% chance by late evening through tonight.

NORTHWEST BAHAMAS (INCLUDING NEW PROVIDENCE, ANDROS, THE BERRY ISLANDS, ELEUTHERA & ADJACENT WATERS):	
ADVISORY:	<b>Small craft advisory for ALL area waters. Small craft operators are urged not to venture far from port.</b>
