

BAHAMAS MARINE FORECAST

MARINE FORECASTS FOR THE BAHAMAS FOR THE NEXT 24 HOURS ISSUED BY THE BAHAMAS DEPARTMENT OF METEOROLOGY AT 6:00 A.M. EDT, Tuesday, July 1, 2025. THE NEXT SCHEDULED FORECAST WILL BE ISSUED AT 12:00 P.M. EDT.

WARNINGS:	<p>Severe Weather: There is a likelihood of isolated occurrences of severe weather (including hail, strong winds and waterspouts) across portions of the Northern and Northwest Bahamas today. Boaters are urged to remain updated of all severe watches and warnings issued by the Bahamas Department of Meteorology.</p> <p>Rip currents: Beachgoers and swimmers should exercise extreme caution along east coast beaches and Atlantic exposures in the Central and Southeast Bahamas.</p>
GENERAL SITUATION:	<p>An upper level low will remain stationary just northeast of the area, while extending a trough across the northern territories. This feature will interact with ample tropical moisture, generating occasional showers and thunderstorms across area waters of the Northern and Northwest Bahamas. Elsewhere, deep layered ridging will continue to build westwards, as the surface high supports fresh to occasionally strong winds and higher seas across the Central and Southeast Bahamas.</p> <p>Outlook: Expect the state of the sea across all areas to persist due to the relatively consistent wind regime. Lingering troughing and moisture will continue to support occasional bursts of heavy showers and thunderstorms across portions of the Northern and Northwest Bahamas through to late Wednesday.</p>
