

## BAHAMAS PUBLIC FORECAST

FORECASTS FOR THE BAHAMAS FOR TODAY, TONIGHT AND THE NEXT SIX (6) DAYS, ISSUED BY THE BAHAMAS DEPARTMENT OF METEOROLOGY AT 6:00 A.M. EDT, Monday, April 27, 2026. THE NEXT SCHEDULED FORECAST WILL BE ISSUED AT 12:00 P.M. EDT.

<b>WARNING IN EFFECT:</b>	<i>There are no public warnings in effect at this time. For additional marine information, please view our Marine Forecast on our website, <a href="http://met.gov.bs">met.gov.bs</a>.</i>
<b>GENERAL SITUATION:</b>	<p>Pre-frontal troughing will bring some early morning showers and isolated thunderstorms across the Northern Bahamas, with gradual clearing expected by the afternoon and into the evening as a weak frontal boundary moves through the area.</p> <p>Meanwhile, a lingering trough across the Southeast Bahamas will support a few isolated showers across the Southernmost islands today, before exiting the region overnight. Elsewhere, weak ridging will keep winds mostly light to gentle, with slight strengthening expected across the Northern Bahamas this evening, following the passage of the frontal boundary.</p> <p><b>Outlook:</b> By late Tuesday through early Wednesday, the frontal boundary is expected to reach the Southeast Bahamas, bringing the chance of a few occasional isolated showers as it drifts southward before exiting the island chain by Wednesday evening. In its wake, high pressure will build across the country, bring mostly stable conditions, warm temperatures and gentle to moderate breezes through Friday. After which, another frontal boundary is expected to approach the Northern Bahamas on Friday, before stalling just to the north of the area through Saturday.</p>
<b>SPECIAL WEATHER NOTES:</b>	<b>UV Index:</b> The public is advised to exercise caution during peak sunshine hours (11am – 3pm) Monday as UV indices are expected in the <b>high to very high</b> range.

NORTHERN BAHAMAS (INCLUDING GRAND BAHAMA, ABACO, BIMINI & ADJACENT WATERS):
