

BAHAMAS PUBLIC FORECAST

FORECASTS FOR THE BAHAMAS FOR TODAY, TONIGHT AND THE NEXT SIX (6) DAYS, ISSUED BY THE BAHAMAS DEPARTMENT OF METEOROLOGY AT 6:00 A.M. EDT, Monday, May 25, 2026. THE NEXT SCHEDULED FORECAST WILL BE ISSUED AT 12:00 P.M. EDT.

WARNING IN EFFECT:

*There are currently no public warnings in effect at this time. A **Near Gale Warning (28 to 33 knots)** is in effect for the Central and Southeast Bahamas. For additional marine information, please view our Marine forecast on our website, met.gov.bs.*

A persistent ridge of high pressure anchored across the Atlantic Basin will continue to dominate weather conditions across the Bahamas, with a dry air mass aloft limiting the potential for thunderstorm activity today. Expect warm temperatures, occasional passing showers and brisk breezes through tonight.

GENERAL SITUATION:

Outlook: High pressure will remain as the dominant weather feature across the Bahamas, with continuous waves of showers and strong winds persisting through to midweek. The ridge will gradually weaken throughout the day beginning on Wednesday, resulting in light to moderate breezes across the region through the remainder of the week. Weather conditions will begin to transition across the Bahamian territories by late Thursday/early Friday morning, as a moist air mass associated with a tropical wave migrates into the area from the Caribbean Sea. Expect cloudy and increasingly humid conditions along with higher rain and thunderstorm chances across the area heading into the region, with the potential for severe weather anticipated on Sunday.

Rip Currents: A **high** risk of dangerous rip currents exists along all east coast and Atlantic-exposed beaches of the island chain. **Beachgoers and swimmers should avoid entering the water along all windward and Atlantic-exposed shorelines.**

SPECIAL WEATHER NOTES:

Heat and UV Index: Residents across **The Bahamas** are advised to remain hydrated, wear protective clothing and sunscreen and seek shaded areas while outside during peak sunshine hours (**11am – 4pm**), as UV indices are expected to be in the **very high** range and heat indices can reach the **upper 90's**.

NORTHERN BAHAMAS

(INCLUDING GRAND BAHAMA, ABACO, BIMINI & ADJACENT WATERS):

SKY CONDITIONS:	Partly sunny to sunny today, turning mostly fair tonight.		
PRECIPITATION:	10 – 30% chance of showers.
