

BAHMET 24/10A

## BAHAMAS PUBLIC FORECAST

FORECASTS FOR THE BAHAMAS, ISSUED BY THE BAHAMAS DEPARTMENT OF METEOROLOGY AT 6:00 A.M. EST, Monday, January 26, 2026, FOR TODAY, TONIGHT AND THE NEXT SIX (6) DAYS. THE NEXT SCHEDULED FORECAST WILL BE ISSUED AT 12:00 P.M. EST.

WARNING IN EFFECT:	<p><b>A Near Gale Warning (28 – 33 knots) will come into effect for the Northern, Northwest and Central Bahamas Monday 6pm through noon on Wednesday.</b> Occasional gusts to gale force are possible across the mentioned areas. Boaters, especially small craft, are urged to return to and remain in port until further notice.</p> <p>For additional marine information, please view our Marine forecast on our website, <a href="http://met.gov.bs">met.gov.bs</a>.</p>
GENERAL SITUATION:	<p>A high pressure ridge is drifting northeastward across the Bahamas a head of a cold front that is schedule to enter the Northern Bahamas by early evening. Widely scattered showers and isolated thunderstorms are ahead and along the front while fresh to strong winds and rough seas are expected behind. Across the remainder of the country a few quick passing showers are expected.</p> <p><b>Outlook:</b> Moderate to strong winds with gusts to near gale force beginning in the Northern islands by night and spreading into the Northwest and Central islands Tuesday and Wednesday. This system will generate another round of cooler temperatures through midweek before stalling just north of the Southeast Bahamas. A reinforcing front will quickly follow by early Thursday morning, eventually merging with the previous front and will exit the country that evening. This will allow temperatures to dip towards more comfortable values across all areas by the end of the work week.</p>
SPECIAL WEATHER NOTES:	<p><b>Rip Currents:</b> There is a <b>high to strong</b> risk of rip currents on the open and Atlantic waters of the island chain, during this week. Beachgoers are advised to refrain from entering these waters.</p> <p><b>Over Topping Waves:</b> Motorist and pedestrians are advised to exercise extreme caution while traversing coastal roads, along sea walls and The Glass Window Bridge on the Island of Eleuthera as waves can cause coastal flood, erosion, deposit debris onto the roadway and can pull pedestrians into the sea.</p>

NORTHERN BAHAMAS (INCLUDING GRAND BAHAMA, ABACO, BIMINI & ADJACENT WATERS):			
SKY CONDITIONS:	Partly sunny during the morning, becoming cloudy to overcast in the late afternoon.		
PRECIPITATION:	30 to 50% chance of widely scattered showers or isolated thunderstorms.
