

BAHAMAS PUBLIC FORECAST

FORECASTS FOR THE BAHAMAS, ISSUED BY THE BAHAMAS DEPARTMENT OF METEOROLOGY AT 6:00 A.M. EDT, Saturday, October 31, 2026, FOR TODAY, TONIGHT AND THE NEXT SIX (6) DAYS. THE NEXT SCHEDULED FORECAST WILL BE ISSUED AT 12:00 P.M. EDT.

WARNING EFFECT: A **Near Gale Warning (28 – 33 knots)** is now in effect for the **Northern Bahamas**. A **Near Gale Watch** is now in effect for the Northwest Bahamas. Occasional gusts to near-gale force are likely across the **Northern Bahamas** beginning at noon and are possible across portions of the Northwest Bahamas by midnight, Sunday, 1st November. **Please see the Marine forecast for more information.**

GENERAL SITUATION: High pressure will build in the wake of an advancing frontal trough positioned across the Northwest Bahamas, allowing strong breezes and gusty conditions to develop over the northern territories. A dome of dry air will keep weather conditions relatively stable for the first portion of the day across most of the areas, with pooling moisture near the trough and a stationary front near the Southeast Bahamas increasing the likelihood of showers to form in these areas by tonight.

Outlook: Gusty winds will spread into the remainder of the Bahamas on Sunday and Monday as high pressure continues to build. Winds will gradually subside by Tuesday, as the front weakens over the area. An upper-level trough moving eastwards from the Gulf of Mexico will interact with a surge of moisture from the Caribbean Sea. Both of these features will increase shower and thunderstorm chances across the northern islands on Sunday, eventually spreading into the remainder of the area by late Sunday night. This wet and unsettled pattern will continue through Tuesday, with drier air beginning to filter into the area beginning midweek. A reinforcing cold front is likely to move into the Bahamas by Friday.

Rip Currents: There is a **moderate to high** risk of dangerous, life-threatening rip currents along all northern, eastern and Atlantic coastlines of the **Northern, Northwest and Central Bahamas**. **Beachgoers are urged to stay out of the water in these areas.** There is a **slight to moderate** risk of rip currents in the **Southeast Bahamas**. **Beachgoers are urged to exercise extreme caution.**

Flooding: There is a **slight to moderate** risk of flooding in low-lying and flood-prone areas of the **Northern and Northwest Bahamas** from Saturday night into Monday as periods of heavy rain develop. **Residents are asked to take the necessary precautions.**

SPECIAL WEATHER NOTES: **Coastal and Tidal Flooding:** High tides near the end of the king-tide period, combined with moderate to large swells, bring a **slight to moderate** risk of coastal and tidal flooding along shorelines and marshland areas through the weekend. **Use caution on low-lying coastal roads near high tide.**

Daylight Savings Time Ends: The public is reminded to set their clocks **back one hour** tonight, as we observe reverting back to **Eastern Standard Time**.

NORTHERN BAHAMAS
(INCLUDING GRAND BAHAMA, ABACO, BIMINI & ADJACENT WATERS):

SKY CONDITIONS:	A mix of sun and clouds, turning partly cloudy to cloudy tonight.		
PRECIPITATION:	10 – 20% chance of showers with possible thunderstorms, increasing to a 20 – 40% chance tonight.		
WINDS:	Northeast to east at 15 to 25 knots with gusts to near gale.		
TEMPERATURES:	MAXIMUM:	MINIMUM:	HEAT INDEX:
	86°F – 89°F / 30°C – 32°C	75°F – 79°F / 24°C – 26°C	N/A

NORTHWEST BAHAMAS
(INCLUDING NEW PROVIDENCE, ANDROS, THE BERRY ISLANDS, ELEUTHERA & ADJACENT WATERS):

SKY CONDITIONS:	Partly sunny today, turning partly cloudy tonight.		
PRECIPITATION:	10 – 30% chance of showers with possible thunderstorms increasing to a 20 – 40% chance late tonight.		
WINDS:	Northeast to east at 10 to 15 knots with higher gusts, increasing 15 to 20 knots with possible gusts to near gale tonight.		
TEMPERATURES:	MAXIMUM:	MINIMUM:	HEAT INDEX:
	86°F – 89°F / 30°C – 32°C	73°F – 77°F / 23°C – 25°C	N/A

BAHMET 24/10A

CENTRAL BAHAMAS

(INCLUDING EXUMA, CAT ISLAND, LONG ISLAND, SAN SALVADOR, RUM CAY & ADJACENT WATERS):

SKY CONDITIONS: Partly sunny today, turning mostly fair tonight.
PRECIPITATION: 10 – 30% chance of showers.
WINDS: Northeast to east at 10 to 15 knots with higher gusts.
TEMPERATURES: **MAXIMUM:** **MINIMUM:** **HEAT INDEX:**
88°F – 91°F / 31°C – 33°C 75°F – 79°F / 24°C – 26°C N/A

SOUTHEAST BAHAMAS

(INCLUDING INAGUA, ACKLINS, CROOKED ISLAND, MAYAGUANA, RAGGED ISLAND & ADJACENT WATERS):

SKY CONDITIONS: Partly sunny today, turning fair to partly cloudy tonight.
PRECIPITATION: 10 – 30% chance of showers with possible thunderstorms.
WINDS: Northeast to east at 10 to 15 knots with higher gusts.
TEMPERATURES: **MAXIMUM:** **MINIMUM:** **HEAT INDEX:**
88°F – 91°F / 31°C – 33°C 75°F – 79°F / 24°C – 26°C N/A

TROPICAL WEATHER OUTLOOK: *Tropical cyclone activity is not expected during the next seven days.*
