

BAHAMAS PUBLIC FORECAST

FORECASTS FOR THE BAHAMAS, ISSUED BY THE BAHAMAS DEPARTMENT OF METEOROLOGY AT 6:00 A.M. EST, Saturday, December 20, 2025, FOR TODAY, TONIGHT AND THE NEXT SIX (6) DAYS. THE NEXT SCHEDULED FORECAST WILL BE ISSUED AT 12:00 P.M. EST.

WARNING IN EFFECT:	<i>There are currently no public warnings in effect at this time.</i>
GENERAL SITUATION:	<p>A cold front is drifting southeastward across the Northern Bahamas and will become stationary in the Northwest Bahamas later this evening. Meanwhile the pre-frontal trough continue creating some unsettled weather as it meanders through the Central Bahamas.</p> <p><b>Outlook:</b> Expect a few streaming showers to occur ahead of the frontal boundary, as a result of surface troughing and moisture for the remainder of the weekend. Another cold front will move across the islands early Monday. Strong high pressure building behind the front will produce strong to gale force breezes across the archipelago heading into the Christmas holiday season.</p>
SPECIAL WEATHER NOTES:	<p><b>Reduced Visibility:</b> Marine operators, residents and early morning commuters can expect reduced visibility in the Northern, Northwest and parts of the Central Bahamas due to mist and fog throughout the Islands. The fog should dissipate by mid-morning.</p> <p><b>Rip Currents:</b> There remains a high risk of hazardous rip currents impacting Atlantic shorelines. Beachgoers and swimmers are urged to refrain from entering the waters in these areas.</p>
