

BAHAMAS PUBLIC FORECAST

FORECASTS FOR THE BAHAMAS, ISSUED BY THE BAHAMAS DEPARTMENT OF METEOROLOGY AT 6:00 A.M. EDT, Thursday, October 29, 2026, FOR TODAY, TONIGHT AND THE NEXT SIX (6) DAYS. THE NEXT SCHEDULED FORECAST WILL BE ISSUED AT 12:00 P.M. EDT.

WARNING IN EFFECT:

There are no public warnings in effect at this time.

Low-level moisture will continue to stream across the island chain increasing the potential for isolated showers across the area today, as a frontal boundary lingers over the Northern and Northwest Bahamas and troughing persists across the southeastern islands. Shower activity is expected to increase across the Southeast Bahamas later this afternoon through tonight as an upper-level trough moves through the area. Hazardous marine conditions will continue across the Northern Bahamas and portions of the Northwest Bahamas this morning, particularly along Atlantic exposures.

GENERAL SITUATION:

Outlook: A slight northward retreat of the frontal boundary on Friday should bring more settled weather to much of the island chain, although showers and thunderstorms will remain possible mainly across the Southeast Bahamas as troughing continues to linger across that area. This improvement is expected to be short-lived across the northern islands, with another frontal boundary forecast to approach the Northern Bahamas late Friday and move into the Northwest Bahamas on Saturday. This frontal boundary will increase shower and thunderstorm chances across the northern islands, along with strengthening winds and building seas, that could produce hazardous marine conditions through Sunday. The boundary is then expected to stall across the Northern and Northwest Bahamas, with associated troughing expected to persist across portions of the Central and Southeast Bahamas through Tuesday.

Rip Currents: There is a *moderate* to *high* risk of dangerous, life-threatening rip currents along all coastlines, including Atlantic shores of the island chain. *Beachgoers should stay out of the water.*

SPECIAL WEATHER NOTES:

Coastal and Tidal Flooding: The highest tides of the year, combined with large swells, bring a *moderate* risk of coastal and tidal flooding along shorelines and marshland areas through tonight. Large north to northeast swells may cause waves to overtop seawalls and coastal roads near high tide along north- and east-facing coasts of the Northern and Northwest Bahamas. *Use caution on coastal roads, including the Glass Window Bridge in Eleuthera.*

NORTHERN BAHAMAS
(INCLUDING GRAND BAHAMA, ABACO, BIMINI & ADJACENT WATERS):

SKY CONDITIONS: Partly sunny to sunny today, becoming mostly fair tonight.

PRECIPITATION: 10 to 20% chance of showers and a possible thunderstorm.

WINDS: Northeast to east at 10 knots or less

TEMPERATURES:

MAXIMUM: 84°F – 88°F / 29°C – 31°C

MINIMUM: 72°F – 75°F / 22°C – 24°C

HEAT INDEX: N/A

NORTHWEST BAHAMAS
(INCLUDING NEW PROVIDENCE, ANDROS, THE BERRY ISLANDS, ELEUTHERA & ADJACENT WATERS):

SKY CONDITIONS: Partly sunny to sunny this morning, becoming a mix of sun and cloud this afternoon, and mostly fair tonight.

PRECIPITATION: 10 to 20% chance of showers this morning, increasing to a 20 to 30% chance this afternoon with a possible isolated thunderstorm.

WINDS: Variable at less than 10 knots, becoming northeast to east at less than 10 knots this evening.

TEMPERATURES:

MAXIMUM: 84°F – 88°F / 29°C – 31°C

MINIMUM: 70°F – 73°F / 21°C – 23°C

HEAT INDEX: N/A

CENTRAL BAHAMAS
(INCLUDING EXUMA, CAT ISLAND, LONG ISLAND, SAN SALVADOR, RUM CAY & ADJACENT WATERS):

SKY CONDITIONS:	Partly sunny this morning, becoming a mix of sun and clouds this afternoon and mostly fair tonight.		
PRECIPITATION:	10 to 30% chance of showers and an isolated thunderstorm.		
WINDS:	Southeast to south at less than 10 knots, becoming variable at less than 10 knots this evening		
TEMPERATURES:	MAXIMUM: 84°F – 88°F / 29°C – 31°C	MINIMUM: 72°F – 77°F / 22°C – 25°C	HEAT INDEX: N/A

SOUTHEAST BAHAMAS
(INCLUDING INAGUA, ACKLINS, CROOKED ISLAND, MAYAGUANA, RAGGED ISLAND & ADJACENT WATERS):

SKY CONDITIONS:	A mix of sun and clouds today, becoming mostly fair tonight.		
PRECIPITATION:	10 to 20% chance of showers this morning, increasing 20 to 40% chance of showers with an isolated thunderstorm this afternoon through tonight.		
WINDS:	East to southeast at 10 knots or less.		
TEMPERATURES:	MAXIMUM: 84°F – 89°F / 29°C – 32°C	MINIMUM: 73°F – 77°F / 23°C – 25°C	HEAT INDEX: N/A

TROPICAL WEATHER OUTLOOK: Tropical cyclone activity is not expected during the next 7 days.

EXTENDED FORECAST FOR THE BAHAMAS FOR FRIDAY, OCTOBER 30, 2026

SKY CONDITIONS:	Northern Bahamas: Partly sunny, fair at night.		
	Northwest and Central Bahamas: A mix of sun and clouds mainly during the afternoon hours, mostly fair at night		
	Southeast Bahamas: Variably cloudy		
PRECIPITATION:	Southeast Bahamas: 30 to 40% chance of showers with thunderstorms.		
	Elsewhere: 10 to 30% chance of showers with possible isolated afternoon thunderstorms.		
	Northern Bahamas: Northeasterly at 10 knots or less, increasing to 10 to 15 knots during the afternoon hours		
WINDS:	Northwest Bahamas: Northeast at 10 knots or less.		
	Central and Southeast Bahamas: Variable at 10 knots or less.		
	MAXIMUM: 84°F – 89°F / 29°C – 32°C	MINIMUM: 72°F – 75°F / 22°C – 24°C	HEAT INDEX: N/A

EXTENDED FORECAST FOR THE BAHAMAS FOR SATURDAY, OCTOBER 31, 2026

SKY CONDITIONS:	Northern Bahamas: Partly sunny during the morning hours, with increasing cloudiness through the afternoon hours		
	Northwest Bahamas: Mostly sunny during the morning hours, becoming as mix of sun and clouds by the afternoon hours.		
	Central and Southeast Bahamas: A mix of sun and clouds.
