

## BAHAMAS PUBLIC FORECAST

**FORECASTS FOR THE BAHAMAS FOR TODAY, TONIGHT AND THE NEXT SIX (6) DAYS, ISSUED BY THE BAHAMAS DEPARTMENT OF METEOROLOGY AT 6:00 A.M. EDT, Tuesday, March 10, 2026. THE NEXT SCHEDULED FORECAST WILL BE ISSUED AT 12:00 P.M. EDT.**

<b>WARNING IN EFFECT:</b>	<i>There are no public warnings in effect at this time. For additional marine information, please view our Marine forecast on our website, <a href="http://met.gov.bs">met.gov.bs</a>.</i>
<b>GENERAL SITUATION:</b>	<p>High pressure ridging will remain in place across much of the country today, supporting generally more stable conditions, warmer temperatures, and gentle to fresh breezes. Some afternoon showers remain possible as temperatures peak during the afternoon hours. Meanwhile, a lingering mid- to upper-level trough interacting with low-level moisture will produce some showers and isolated thunderstorms across the Southeastern Bahamas this afternoon and into the evening hours.</p> <p><b>Outlook:</b> As this mid-to upper level trough exits the area through Wednesday and deep ridging develops across the region, weather conditions should remain fairly quiet, with only the chance of a few afternoon showers associated with daytime heating as temperatures gradually warm through Thursday. By Friday, a weak frontal boundary is forecast to move into the Northern Bahamas, bringing increased shower and thunderstorm activity across the Northern and Northwest Bahamas as it stalls in the vicinity through the weekend.</p>
<b>SPECIAL WEATHER NOTES:</b>	<p><b>Rip Currents:</b> There remains a <b>moderate</b> to <b>high risk</b> of rip currents for the Atlantic waters and all east and southeast coastal waters of the island chain. <i>Swimmers in these areas are urged to remain nearshore.</i></p> <p><b>UV Index:</b> Higher UV levels are expected over the next few days across portions of the island chain. Therefore, the public is urged to remain hydrated, wear protective clothing, such as wide-brimmed hats, sunglasses, and sunscreen, and to seek shaded areas during peak daylight hours.</p>
