

BAHAMAS PUBLIC FORECAST

BAHAMAS PUBLIC FORECAST FOR TONIGHT, TOMORROW AND THE NEXT SIX (6) DAYS, ISSUED BY THE BAHAMAS DEPARTMENT OF METEOROLOGY AT 6:00 P.M. EDT, Friday, April 17, 2026. THE NEXT SCHEDULED FORECAST WILL BE ISSUED AT 6:00 A.M. EDT TOMORROW.

WARNING IN EFFECT:	<i>There are currently no public warnings in effect. For marine information, please view our Marine Forecast on our website, met.gov.bs.</i>
GENERAL SITUATION:	The remnants of a surface trough will continue to support a few passing showers as it gradually weakens overnight. High pressure will largely dominate weather conditions on Saturday, driving warmer temperatures, light to moderate winds and relatively stable conditions. Outlook: Residual moisture from the trough will continue to support a few isolated showers across the island chain, along with light to gentle winds and warmer springtime temperatures through the weekend. A late season cold front is expected to move into the Northern islands by Monday accompanied once again by a wet weather pattern along with moderate to strong breezes that is expected to affect the islands through the end of the work week.
SPECIAL WEATHER NOTES:	Rip Currents: A moderate risk of rip currents and moderate to rough surf persists along all Atlantic-exposed beaches and shorelines. Beachgoers and swimmers are advised to exercise caution when entering these waters.
