<b>WARNING IN EFFECT:</b>	<i>There are currently no public warnings in effect at this time. For additional marine information, please view our Marine forecast on our webpage, <a href="http://met.gov.bs">met.gov.bs</a>.</i>
<b>GENERAL SITUATION:</b>	<p>A weakening ridge of high pressure continues to support pockets of showers over the central and southeastern islands tonight. Meanwhile, prefrontal troughing associated with an approaching cold front is expected to produce some shower and thunderstorm activity over portions of the Northern Bahamas early Saturday morning into midday.</p> <p><b>Outlook:</b> The associated front is anticipated to reach the Northern Islands by Sunday, where it will stall over the Northwest Bahamas into early next week. This lingering boundary will keep the chance of a few passing showers in the forecast before gradually weakening by midweek. Boating and beach conditions will remain generally favorable over the next few days, with conditions expected to deteriorate early next week, as winds strengthen and seas become rough from late Monday into Tuesday.</p>
<b>SPECIAL WEATHER NOTES:</b>	<b>Rip Currents:</b> There is a <i>moderate</i> to <i>high risk</i> of rip currents for the Atlantic coastal waters of the Southeast Bahamas. <i>Swimmers are advised not to enter these waters.</i> There is a <i>slight risk</i> of rip currents for the Atlantic waters of the Northern, Northwest and Central Bahamas. <i>Swimmers are advised to exercise extreme caution when entering these waters.</i>
