## BAHAMAS PUBLIC FORECAST

BAHAMAS PUBLIC FORECAST FOR TONIGHT, TOMORROW AND THE NEXT SIX (6) DAYS, ISSUED BY THE BAHAMAS DEPARTMENT OF METEOROLOGY AT 6:00 P.M. EST, Monday, January 12, 2026. THE NEXT SCHEDULED FORECAST WILL BE ISSUED AT 6:00 A.M. EST TOMORROW.

WARNING IN EFFECT:	<i>There are no public warnings in effect at this time. For additional marine information, please view our marine forecast on our website, met.gov.bs.</i>
GENERAL SITUATION:	<p>A weak cold front sits just north of the Capital this afternoon with a few isolated showers behind the boundary. Meanwhile, weak low-level troughing will support some shower activity over portions of the Southeast Bahamas overnight into tomorrow.</p> <p><b>Outlook:</b> The front is expected to stall and gradually dissipate near the Northwest Bahamas through tomorrow. On Wednesday, prefrontal troughing associated with another approaching cold front will generate scattered showers across the northern islands, while lingering troughing supports a few light showers over parts of the Central and Northwest Bahamas. By early Thursday, the cold front is forecast to move into the area and progress through the archipelago, bringing increased shower activity and the potential for thunderstorms through the end of the work week. In its wake, much cooler temperatures are expected, along with strong winds and building seas as high pressure settles in behind the front, leading to rough marine conditions into the weekend.</p>
SPECIAL WEATHER NOTES:	<p><b>Rip Currents:</b> There is a <b>moderate to high</b> risk of rip currents along all Atlantic-exposed shorelines. Beachgoers and swimmers are strongly advised to exercise extreme caution when entering these waters.</p>
