BAHAMAS PUBLIC FORECAST

BAHAMAS PUBLIC FORECAST FOR TONIGHT, TOMORROW AND THE NEXT SIX (6) DAYS, ISSUED BY THE BAHAMAS DEPARTMENT OF METEOROLOGY AT 6:00 P.M. EDT, Monday, November 3, 2025. THE NEXT SCHEDULED FORECAST WILL BE ISSUED AT 6:00 A.M. EDT TOMORROW.

WARNING IN EFFECT:	No warnings in effect.
GENERAL SITUATION:	A weak cold front across the Northern Bahamas will generate some brief isolated showers across the Northern and Northwest Bahamas through tomorrow, while troughing associated with a dissipated frontal boundary over the Central Bahamas will support a few showers across that area. Outlook: This cold front is expected to stall across the Central Bahamas by midweek. High pressure will build behind the front, ushering in drier, cooler, and breezy conditions across the northern half of the country. Meanwhile, the lingering front will keep showers chances elevated over the Central and Southern portions of the country into the late work week.
SPECIAL WEATHER NOTES:	Rip currents: Beachgoers and swimmers across all areas should NOT enter Atlantic waters beaches as there is high risk of rip currents. Coastal Flooding: Due to the full moon, residents should be alert for flooding along banks, marshes and coastal areas during high tide. There is a marginal risk of a few moderate to severe thunderstorms mainly across the Southeast Bahamas tonight.
