

BAHAMAS PUBLIC FORECAST

BAHAMAS PUBLIC FORECAST FOR TONIGHT, TOMORROW AND THE NEXT SIX (6) DAYS, ISSUED BY THE BAHAMAS DEPARTMENT OF METEOROLOGY AT 6:00 P.M. EDT, Monday, September 15, 2025. THE NEXT SCHEDULED FORECAST WILL BE ISSUED AT 6:00 A.M. EDT TOMORROW.

WARNING IN EFFECT:	<i>There are currently no public warnings in effect.</i>
GENERAL SITUATION:	<p>Troughing and abundant tropical moisture will continue to influence the Northern and Northwestern Bahamas, resulting in occasional showers and isolated thunderstorms through tomorrow. Elsewhere, weak high pressure will support generally stable conditions, with just a stray shower or isolated afternoon thunderstorm possible. Light to moderate winds will persist overnight, increasing to moderate to fresh breezes across the Central and Southeastern Islands by tomorrow.</p> <p><i>Outlook:</i> A shift to a more unsettled pattern is expected by midweek over the Northern and Northwestern Bahamas due to a combination of deep-layered troughing and tropical moisture, supporting cloudy skies with scattered showers and thunderstorms through the end of the work week. Additionally, by the end of the work week, the northern extent of a tropical wave along with an approaching mid to upper-level low will increase shower and thunderstorm chances across the Southeastern Islands into the weekend.</p>
SPECIAL WEATHER NOTES:	<p><i>Heat/UV Index:</i> Residents are advised to remain hydrated, wear protective clothing, such as wide-brimmed hats, sunglasses, and sunscreen, and to seek shaded areas during peak daylight hours, as a result of heat indices reaching in the upper 90's to lower triple digits, and UV levels in the very high to high range.</p>
