

BAHAMAS PUBLIC FORECAST

BAHAMAS PUBLIC FORECAST FOR TONIGHT AND THE NEXT SIX (6) DAYS, ISSUED BY THE BAHAMAS DEPARTMENT OF METEOROLOGY AT 6:00 P.M. EDT, Monday, October 5, 2026. THE NEXT SCHEDULED FORECAST WILL BE ISSUED AT 6:00 A.M. EDT TOMORROW.

WARNING IN EFFECT:

There are no public warnings in effect at this time.

Deep-layered troughing across the Southeast Bahamas, combined with abundant moisture, will enhance shower and thunderstorm activity across the area through Tuesday. Meanwhile, weak surface ridging will maintain generally light to gentle breezes across the island chain, along with a few passing showers.

GENERAL SITUATION:

Outlook: By late Tuesday into early Wednesday, a pre-frontal trough is expected to develop just north of the Northern islands, supporting an increase in shower and thunderstorm activity across that area through Thursday. Elsewhere, weak high pressure will maintain generally light winds and a few isolated passing showers. By the end of the work week, a tropical wave is expected to move into the Southeast Bahamas, bringing increased shower activity into the weekend as it tracks westward across the Caribbean Sea.

SPECIAL WEATHER NOTES:

Rip Currents: There is a *slight to moderate* risk of rip currents across all Atlantic waters. *Beachgoers and swimmers are urged to exercise caution.*
