

## BAHAMAS PUBLIC FORECAST

**BAHAMAS PUBLIC FORECAST FOR TONIGHT, TOMORROW AND THE NEXT SIX (6) DAYS, ISSUED BY THE BAHAMAS DEPARTMENT OF METEOROLOGY AT 6:00 P.M. EDT, Saturday, April 25, 2026. THE NEXT SCHEDULED FORECAST WILL BE ISSUED AT 6:00 A.M. EDT TOMORROW.**

<b>WARNING IN EFFECT:</b>	<i>There are no public warnings in effect at this time. For additional marine information, please view our marine forecast on our website, <a href="http://met.gov.bs">met.gov.bs</a>.</i>
<b>GENERAL SITUATION:</b>	<p>Gentle to moderate breezes will continue across the island chain through tomorrow, as lingering troughing across the Southeast Bahamas supports a few spotty showers. Meanwhile, weak ridging across the remainder of islands will maintain generally stable conditions, with some possible afternoon showers.</p> <p><b>Outlook:</b> Gentle breezes and lingering moisture will keep occasional pops of showers in the forecast, with a dry air mass capping any significant weather for the majority of the week ahead. A weak frontal boundary will drift and linger just north of the island chain by early Monday, crossing the Northernmost islands by Monday afternoon and exiting the area by midweek with little fanfare. High pressure will become nestled over the area by Wednesday, keeping the light wind regime in place. Another late season cold front may move off the Florida coast by the end of the week, bringing in possible thunderstorm activity beginning late Thursday.</p>
<b>SPECIAL WEATHER NOTES:</b>	<b>Rip Currents:</b> There remains a marginal risk of rip currents for the Atlantic waters of the island chain. There is a slight risk of rip currents on the sheltered waters of the island chain. Beachgoers in these areas are urged to exercise caution.

NORTHERN BAHAMAS (INCLUDING GRAND BAHAMA, ABACO, BIMINI & ADJACENT WATERS):			
<b>SKY CONDITIONS:</b>	Mostly fair tonight, becoming partly sunny to sunny tomorrow.		
<b>PRECIPITATION:</b>	10% chance of showers.
