BAHAMAS PUBLIC FORECAST

BAHAMAS PUBLIC FORECAST FOR TONIGHT, TOMORROW AND THE NEXT SIX (6) DAYS, ISSUED BY THE BAHAMAS DEPARTMENT OF METEOROLOGY AT 6:00 P.M. EDT, Sunday, September 14, 2025. THE NEXT SCHEDULED FORECAST WILL BE ISSUED AT 6:00 A.M. EDT TOMORROW.

WARNING IN EFFECT:	<i>There are currently no public warnings in effect.</i>
GENERAL SITUATION:	<p>Isolated to widely scattered showers will persist over portions of the Northwest Bahamas tonight, as a dissipating frontal boundary over the Northern Bahamas retreats northward towards Florida. An approaching tropical wave will steadily increase shower and thunderstorm chances across the Southeast Bahamas through the forecast period.</p> <p><i>Outlook:</i> The frontal boundary is anticipated to weaken through mid-week, however residual troughing is expected to remain across the Northern islands keeping shower and isolated thunderstorm activity in the forecast. Meanwhile, low level troughing is expected to enter the Central and Southeast Bahamas on Tuesday increasing shower activity in the Southeast Bahamas and portions of Central Bahamas.</p>
SPECIAL WEATHER NOTES:	<p><i>Heat/UV Index:</i> On Monday, residents are advised to remain hydrated, wear protective clothing, such as wide-brimmed hats, sunglasses, and sunscreen, and to seek shaded areas during peak daylight hours, as a result of heat indices reaching in the upper 90's to lower triple digits, and UV levels in the very high to high range.</p>
