

BAHAMAS PUBLIC FORECAST

BAHAMAS PUBLIC FORECAST FOR TONIGHT, TOMORROW AND THE NEXT SIX (6) DAYS, ISSUED BY THE BAHAMAS DEPARTMENT OF METEOROLOGY AT 6:00 P.M. EDT, Sunday, October 4, 2026. THE NEXT SCHEDULED FORECAST WILL BE ISSUED AT 6:00 A.M. EDT TOMORROW.

WARNING IN EFFECT:

There are currently no public warnings in effect at this time.

A weak high pressure is supporting a gentle to moderate breeze, slight to smooth seas and brief passing shower or an isolated thunderstorm over most of the area. Showers and thunderstorms may be heavier and more prolonged in the Southeastern Islands due to an upper- level low drifting south across the South across that area through tomorrow.

GENERAL SITUATION:

Outlook: On Tuesday a cold front will drift south stalling across Central Florida with a pre-frontal trough producing unsettled weather across the Northern Islands. The Northern Islands will remain cloudy and wet as a low pressure area migrate along the front from the Gulf of Mexico and settled just north of Grand Bahama through Thursday. On Friday the Southeast Bahamas will see a Tropical wave producing increased shower activity into the weekend as it treks westward across the Caribbean Sea.

SPECIAL WEATHER NOTES:

Rip Currents: There is a *slight* to *moderate* risk of rip currents across all Atlantic waters. *Beachgoers and swimmers are urged to exercise caution.*
