

BAHAMAS PUBLIC FORECAST

BAHAMAS PUBLIC FORECAST FOR TONIGHT AND THE NEXT SIX (6) DAYS, ISSUED BY THE BAHAMAS DEPARTMENT OF METEOROLOGY AT 6:00 P.M. EDT, Sunday, October 11, 2026. THE NEXT SCHEDULED FORECAST WILL BE ISSUED AT 6:00 A.M. EDT TOMORROW.

WARNING IN EFFECT: *There are currently no public warnings in effect at this time.*

High pressure ridging continues to support moderate to locally fresh winds while shifting eastward through tonight. Meanwhile, a westward moving, low level disturbance over the Southeast Bahamas continues to aid in enhancing moisture across the archipelagic chain.

GENERAL SITUATION: **Outlook:** A frontal boundary is expected to move into the northern islands by midday Monday, then progress southward along the island chain before stalling and weakening across the Central Bahamas by Tuesday. Meanwhile, increasing moisture and troughing associated with a disturbance moving westward toward the country will support periods of showers and thunderstorms ahead of the boundary. As the front retreats northward by midweek, unsettled conditions are expected to persist through the remainder of the week and into the weekend, as another frontal system advances toward the southeastern United States.

SPECIAL WEATHER NOTES: There is a **high** risk of rip currents on the **offshore and Atlantic waters of the Southeast Bahamas**. There is a **slight to moderate** risk along Atlantic shorelines across the remainder of the Bahamas. *Swimmers are advised to refrain from entering the waters in the Southeast Bahamas, and should continue to exercise caution elsewhere.*
