

BAHAMAS PUBLIC FORECAST

BAHAMAS PUBLIC FORECAST FOR TONIGHT AND THE NEXT SIX (6) DAYS, ISSUED BY THE BAHAMAS DEPARTMENT OF METEOROLOGY AT 6:00 P.M. EDT, Sunday, August 16, 2026. THE NEXT SCHEDULED FORECAST WILL BE ISSUED AT 6:00 A.M. EDT TOMORROW.

WARNING IN EFFECT:

A Heat Advisory remains in effect for the Northern and Northwest Bahamas. Residents and visitors should take the necessary precautions while outdoors during peak sunshine hours (10 am – 4 pm) and to safeguard their health as heat indices ranging from **102°F to 116°F** are anticipated.

A Dust Advisory remains in effect for the entire Bahamas, as well as the Turks & Caicos Islands through tomorrow. The level of dust is expected to reach moderate levels which may impact air quality and hinder visibility at times. Residents, especially those with respiratory illnesses, should take precautions to safeguard their health.

Near Gale Warning: A near gale warning (winds 28-33 knots) remains in effect for the Southeast Bahamas (Mainly south of Inagua) until midnight. Residents should exercise extreme caution along Atlantic facing coastal roads due to wind driven waves that may cause overtopping waves and coastal flooding.

High pressure ridging combined with a plume of Saharan Dust continues to dominate the region supporting stable, hot dry and hazy conditions, gentle to moderate winds over the Northern territories but moderate to locally fresh over the Central and Southeast Bahamas.

GENERAL SITUATION:

Outlook: Very little change in weather conditions is expected through the upcoming workweek as high pressure remains anchored over the archipelago. Shower chances will remain low due to Saharan dust. By midweek, moisture streaming across the Northern islands ahead of a weak trough will increase shower chances over the area.

SPECIAL WEATHER NOTES:

Rip Currents: There is a **high** risk of rip currents for the Central and Southeast Bahamas while a **moderate** risk exists over the Northern and Northwest Bahamas. *Beachgoers and swimmers, particularly those in the Central and Southeast Bahamas, are strongly advised to refrain from entering waters along eastern and southern shorelines and Atlantic exposed beaches at this time.*

UV Index: Members of the public are advised to wear protective clothing and sunscreen and seek shaded areas while outside during peak sunshine hours (**11am – 4pm**), as UV indices are expected to be in the **very high** to **extreme** range tomorrow.
