

BAHAMAS PUBLIC FORECAST

BAHAMAS PUBLIC FORECAST FOR TONIGHT, TOMORROW AND THE NEXT SIX (6) DAYS, ISSUED BY THE BAHAMAS DEPARTMENT OF METEOROLOGY AT 6:00 P.M. EDT, Sunday, August 23, 2026. THE NEXT SCHEDULED FORECAST WILL BE ISSUED AT 6:00 A.M. EDT TOMORROW.

WARNING IN EFFECT:

*A **Heat Advisory** remains in effect for the entire Bahamas as well as the Turks and Caicos Islands. Residents and visitors across all areas, especially in the Northern and Northwest Bahamas, should continue to remain hydrated, seek shaded areas and restrict strenuous outdoor activity between peak hours (between 11 am – 4pm).*

GENERAL SITUATION:

Troughing near the Northern Islands will continue to generate a few showers or an isolated thunderstorm through tomorrow while Saharan Dust across the area prevents them from becoming severe. The northern end of a tropical wave will pass near or over the Southeastern Islands tonight and tomorrow generating unsettled weather in the above mentioned Islands that will spread across parts of the Central Islands tomorrow. Elsewhere high pressure is dominating the weather across the remainder of the country.

Outlook: Hot and humid conditions will continue across the country this week, hazy at times as the plume of dust moves in and out of the area. Another tropical wave will drift westward across the southern Islands in the middle of the week, while troughing in the vicinity of the northern islands, introduce moisture into these areas producing unsettled weather through Thursday.

Rip Currents: There is a **slight** to **moderate** risk of rip currents affecting the eastern and southern shorelines of the Southeast Bahamas. *Beachgoers and swimmers are advised to exercise caution when entering the water.*

SPECIAL WEATHER NOTES:

UV Index: Members of the public are advised to wear protective clothing and sunscreen and seek shaded areas while outside during peak sunshine hours (**11am – 4pm**), as UV indices are expected to be in the **high** to **extreme** range.

Saharan Dust: The level of dust may reach **moderate** levels which could impact air quality and hinder visibility at times across the Northern and Northwest Bahamas. *Residents, especially those with respiratory illnesses, should take precautions to safeguard their health.*

NORTHERN BAHAMAS
(INCLUDING GRAND BAHAMA, ABACO, BIMINI & ADJACENT WATERS):

SKY CONDITIONS:	Partly cloudy through tomorrow.		
PRECIPITATION:	20 to 30% chance of isolated showers and thunderstorms.
