

BAHAMAS PUBLIC FORECAST

BAHAMAS PUBLIC FORECAST FOR TONIGHT, TOMORROW AND THE NEXT SIX (6) DAYS, ISSUED BY THE BAHAMAS DEPARTMENT OF METEOROLOGY AT 6:00 P.M. EDT, Thursday, July 3, 2025. THE NEXT SCHEDULED FORECAST WILL BE ISSUED AT 6:00 A.M. EDT TOMORROW.

WARNING IN EFFECT:	<i>A severe weather watch is in effect for the Northern Bahamas. The public is urged to keep updated on all severe weather warnings issued by the Bahamas Department of Meteorology.</i>
GENERAL SITUATION:	<p>Trapped, abundant tropical moisture and troughing ahead of an old frontal boundary draped across the southeastern U.S. will promote cloudiness across much of the island chain while triggering heavier showers and thunderstorms across portions of the Northern Bahamas. Broad ridging will sustain relatively stable conditions in a moderate to fresh wind regime throughout the period. A low pressure system is forecast to develop north of the Bahamas on Friday, keeping a wet weather pattern across the northernmost islands.</p> <p><i>Outlook:</i> Rain bands from this system will impact portions of the island chain this weekend. The low will lift northwards, gradually decreasing shower and thunderstorm chances through early next week, as high pressure builds westwards across the area.</p>
SPECIAL WEATHER NOTES:	<p><b>Potential Tropical System Impacts:</b> A low is forecast to develop off the coast of Florida on Friday, and may become a tropical or sub-tropical system later on this weekend. <b>Although this system will not directly impact the Bahamas, strong to gale force winds may potentially be experienced across Grand Bahama, Bimini and Abaco, with periods of excessive rainfall and bouts of severe weather occurring over portions of the island chain beginning on Friday and continuing for this weekend.</b> The public is urged to follow our forecasts and severe weather warnings on our Facebook page or our website, met.gov.bs, to remain updated on the development of this system.</p> <p><b>Rip Currents:</b> There is a <b>moderate risk</b> of rip currents along east and south coast beaches and along all Atlantic exposures, therefore beachgoers and swimmers should remain vigilant.</p>
