BAHMET 24/10C

## **BAHAMAS PUBLIC FORECAST**

BAHAMAS PUBLIC FORECAST FOR TONIGHT, TOMORROW AND THE NEXT SIX (6) DAYS, ISSUED BY THE BAHAMAS DEPARTMENT OF METEOROLOGY AT 6:00 P.M. EDT, Thursday, August 21, 2025. THE NEXT SCHEDULED FORECAST WILL BE ISSUED AT 6:00 A.M. EDT TOMORROW.

| WARNING IN EFFECT:        | A Heat Advisory will be in effect for The Bahamas on Friday. Expect feel-like temperatures to reach upwards to 112°F. The public is urged to remain hydrated, seek shaded areas and avoid rigorous physical activity between 10am – 5pm.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |  |  |
|---------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--|--|
| GENERAL<br>SITUATION:     | Spontaneous shower and thunderstorm activity due to trailing moisture in the wake of Erin will taper off heading into the overnight hours, and will return by Friday afternoon, as the storm continues to drift further away from the area. Despite Erin's distance from the Bahamas, hazardous beaching conditions will remain in place for the northern and eastern Atlantic shorelines. Weak ridging will support light winds and extremely warm temperatures heading into the weekend.  **Outlook:** Showers will remain in the forecast through the start of the weekend as high pressure reestablishes itself across the area, restoring the typical summertime pattern. Expect very hot and humid conditions with the occasional passing shower or isolated afternoon thunderstorm. |  |  |
| SPECIAL<br>WEATHER NOTES: | Rip currents: There is a moderate risk of hazardous rip currents and locally rough surf affecting all Atlantic exposures. Residents and beachgoers along Atlantic exposed coastlines, are still urged to refrain from venturing in or near the ocean.  Coastal Threats: There remains a slight risk of minor coastal flooding and coastal erosion for all Atlantic shorelines, especially during periods of high tide.  UV Index: For Friday and heading into the weekend, the public is urged to wear protective clothing and seek shaded areas during peak daylight hours, due to anticipated high to extreme UV indices.                                                                                                                                                                |  |  |

| NORTHERN BAHAMAS<br>(INCLUDING GRAND BAHAMA, ABACO, BIMINI & ADJACENT WATERS):                                                                 |                                                                                     |                           |                                           |
|------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------|---------------------------|-------------------------------------------|
| SKY CONDITIONS: Mostly fair, with occasional cloudy patches mainly across Grand Bahamas and Bimini tonight. A mix of sun and clouds on Friday. |                                                                                     |                           |                                           |
