

BAHAMAS PUBLIC FORECAST

BAHAMAS PUBLIC FORECAST FOR TONIGHT, TOMORROW AND THE NEXT SIX (6) DAYS, ISSUED BY THE BAHAMAS DEPARTMENT OF METEOROLOGY AT 6:00 P.M. EST, Thursday, February 12, 2026. THE NEXT SCHEDULED FORECAST WILL BE ISSUED AT 6:00 A.M. EST TOMORROW.

WARNING IN EFFECT:	<i>There are no public warnings in effect at this time. For additional marine information, please view our marine forecast on our website, met.gov.bs.</i>
GENERAL SITUATION:	<p>Overnight, a weak frontal boundary will slip into the Northern Bahamas, bringing a few showers through early Friday, before slowly creeping into the Northwest Bahamas by the afternoon. Meanwhile, weak troughing supporting some cloudy conditions and isolated showers in the Southeast Bahamas will gradually weaken as the boundary drifts southward. Winds are expected to remain light to moderate through Friday evening.</p> <p>Outlook: The front is expected to gradually weaken as residual moisture persists across the island chain into the weekend. In its wake, high pressure will build through the latter half of the weekend, ushering in warmer temperatures and occasionally brisk breezes. By Sunday, a developing low-pressure system off the U.S. East Coast will drive another frontal boundary toward the area. This system may introduce a more active weather pattern, primarily across the northern territories, by Monday, before high pressure returns and more stable conditions reestablish by midweek.</p>
SPECIAL WEATHER NOTES:	Rip Currents: There is a moderate risk of rip currents for all coastal Atlantic waters of the island chain. Beachgoers and swimmers are asked to exercise caution in these areas.

NORTHERN BAHAMAS (INCLUDING GRAND BAHAMA, ABACO, BIMINI & ADJACENT WATERS):			
SKY CONDITIONS:	Variably cloudy tonight, becoming a mix of sun and clouds tomorrow.		
PRECIPITATION:	30 to 40% chance of showers through tomorrow, decreasing to 10 to 30% chance by Friday evening
