

BAHAMAS PUBLIC FORECAST

BAHAMAS PUBLIC FORECAST FOR TONIGHT, TOMORROW AND THE NEXT SIX (6) DAYS, ISSUED BY THE BAHAMAS DEPARTMENT OF METEOROLOGY AT 6:00 P.M. EST, Tuesday, February 17, 2026. THE NEXT SCHEDULED FORECAST WILL BE ISSUED AT 6:00 A.M. EST TOMORROW.

WARNING IN EFFECT:	<i>There are currently no public warnings in effect at this time. For additional marine information, please see our Marine forecast on our website, met.gov.bs.</i>
GENERAL SITUATION:	<p>While a cold front weakens across the country, high pressure is building and trekking eastward across the area. Gentle to moderate winds will persist through tomorrow while moderate sea swell inundate our Atlantic exposed coast lines.</p> <p>Outlook: High pressure building across the archipelago, will support gentle to fresh breezes, isolated showers and mostly stable weather conditions as the front gradually weakens by midweek. A brief warming trend is anticipated by the end of the week in a southerly wind regime, as the surface ridge shifts further into the Atlantic. Another cold front is expected to move into the area by late Sunday, allowing temperatures to dip below seasonal norms for next week.</p>
SPECIAL WEATHER NOTES:	Rip Currents: There remains a <i>moderate</i> to <i>high</i> risk of rip currents for all Atlantic exposed waters of the country. <i>Swimmers are urged to remain on shore.</i>
