

## BAHAMAS PUBLIC FORECAST

BAHAMAS PUBLIC FORECAST FOR TONIGHT AND THE NEXT SIX (6) DAYS, ISSUED BY THE BAHAMAS DEPARTMENT OF METEOROLOGY AT 6:00 P.M. EDT, Wednesday, August 5, 2026. THE NEXT SCHEDULED FORECAST WILL BE ISSUED AT 6:00 A.M. EDT TOMORROW.

WARNING IN EFFECT: *There are no public warnings in effect.*

Showers and thunderstorms will remain active across the Northern, Northwest and portions of the Central Bahamas this evening and tonight as abundant tropical moisture will continue to interact with a lingering upper-level disturbance. Meanwhile, across the Southeast Bahamas a trough approaching from the east will bring increasing shower and thunderstorm activity across that area overnight into early Thursday, before lifting to the northwest maintaining an unsettled weather pattern across the island chain through Friday.

GENERAL SITUATION:

**Outlook:** Heading into the weekend, most of the deeper tropical moisture is expected to move out of the area as the ridge of high pressure strengthens. This will promote more stable weather conditions, allowing for a generally pleasant Saturday and Sunday with lower shower and thunderstorm chances across much of the Bahamas.

**Severe Thunderstorm Risk:** *There is a moderate risk for a few isolated strong to severe thunderstorms, particularly across the Northern, Northwest and Central Bahamas.* These storms are capable of producing *strong gusty winds*, frequent lightning, heavy downpours, and *waterspout activity*. *The public is urged to remain updated on all severe weather warnings issued by the Bahamas Department of Meteorology.*

SPECIAL WEATHER NOTES:

**Rip Currents:** There is a slight to moderate risk of rip currents for the Atlantic coastal waters of the Bahamas archipelago and east and southeast sheltered coastal waters of parts of the Central and the entire Southeast Bahamas.

**UV Index:** Members of the public are advised to wear protective clothing and sunscreen and seek shaded areas while outside during peak sunshine hours (11am – 4pm), as UV indices are expected to be in the very high to extreme range.

NORTHERN BAHAMAS  
(INCLUDING GRAND BAHAMA, ABACO, BIMINI & ADJACENT WATERS):

|                 |                                                                                                         |                                       |                                           |
|-----------------|---------------------------------------------------------------------------------------------------------|---------------------------------------|-------------------------------------------|
