

BAHAMAS PUBLIC FORECAST

BAHAMAS PUBLIC FORECAST FOR TONIGHT AND THE NEXT SIX (6) DAYS, ISSUED BY THE BAHAMAS DEPARTMENT OF METEOROLOGY AT 6:00 P.M. EDT, Wednesday, October 7, 2026. THE NEXT SCHEDULED FORECAST WILL BE ISSUED AT 6:00 A.M. EDT TOMORROW.

WARNING IN EFFECT: *There are currently no warnings in effect at this time.*

Pre-frontal troughing near the Northern Bahamas will continue to support elevated shower and thunderstorm chances across the northern islands tonight through early Thursday. On Thursday, this troughing is expected to shift slightly northward as a tropical wave moves south of the Southeast Bahamas, bringing additional moisture and troughing that will increase shower and thunderstorm activity across portions of the southern islands on Thursday.

GENERAL SITUATION:

Outlook: As moisture and troughing shift across the Central and Northwest Bahamas through Friday and Saturday, shower and thunderstorm chances will remain elevated across the region. By the weekend, activity is expected to gradually diminish as strong high pressure builds across the island chain, ushering in more settled and stable conditions that will extend into early next week.

SPECIAL WEATHER NOTES:

Rip Currents: There is a *slight* risk of rip currents across all Atlantic-exposed waters. *Beachgoers and swimmers are advised to exercise caution when entering the water.*

NORTHERN BAHAMAS
(INCLUDING GRAND BAHAMA, ABACO, BIMINI & ADJACENT WATERS):

SKY CONDITIONS: Partly to variably cloudy tonight, becoming a mix of sun and clouds tomorrow.
PRECIPITATION: 20 to 30% chance of showers and an isolated thunderstorm.
