BAHAMAS PUBLIC FORECAST

BAHAMAS PUBLIC FORECAST FOR TONIGHT, TOMORROW AND THE NEXT SIX (6) DAYS, ISSUED BY THE BAHAMAS DEPARTMENT OF METEOROLOGY AT 6:00 P.M. EST, Tuesday, November 18, 2025. THE NEXT SCHEDULED FORECAST WILL BE ISSUED AT 6:00 A.M. EST TOMORROW.

WARNING IN EFFECT:	<i>There are no public warnings in effect at this time.</i>
GENERAL SITUATION:	High pressure continues to produce gentle to moderate breezes and mostly stable weather conditions. Meanwhile, a westward-moving low-level trough just east of the Southeastern Islands supports the chance of few spotty showers across portions of that area tonight into Wednesday. Outlook: The aforementioned low-level trough near the Southeast Bahamas will increase shower chances over that area on Wednesday before dissipating into Thursday. Weak high pressure ridging will support mostly stable weather across the archipelago through the end of the work week though a few stray showers are possible along the breeze. Expect light and gentle winds through Wednesday before winds increase moderate to fresh through the remainder of the week.
SPECIAL WEATHER NOTES:	None.
