

BAHAMAS PUBLIC FORECAST

BAHAMAS PUBLIC FORECAST FOR TONIGHT, TOMORROW AND THE NEXT SIX (6) DAYS, ISSUED BY THE BAHAMAS DEPARTMENT OF METEOROLOGY AT 6:00 P.M. EST, Wednesday, February 25, 2026. THE NEXT SCHEDULED FORECAST WILL BE ISSUED AT 6:00 A.M. EST TOMORROW.

WARNING IN EFFECT:	<p><i>There are no public warnings in effect at this time.</i></p> <p><i>For additional marine information, please view our Marine forecast on our website, met.gov.bs.</i></p>
GENERAL SITUATION:	<p>The country remains on the western edge of a broad high-pressure ridge, resulting in moderate to occasionally fresh breezes across the island chain tonight and into tomorrow. Meanwhile, moisture associated with a nearby frontal boundary will induce cloudy conditions over the southern half of the country through tomorrow, while triggering some shower activity over those areas later tonight and into tomorrow as the boundary gradually lifts northward.</p> <p>Outlook: Moisture and weak troughing associated with the remnant frontal boundary will continue to lift northward, maintaining an elevated chance of some shower activity through the remainder of the work week. Temperatures are also anticipated to continue trending warmer throughout the week as high pressure continues to shift eastward across the Tropical Atlantic, providing a warm, moist generally southeasterly flow over the archipelago.</p>
SPECIAL WEATHER NOTES:	<p>Rip Currents and Rough Surf: A <i>moderate</i> to <i>high risk</i> of dangerous, life-threatening rip currents and rough surf exists along all windward and Atlantic-exposed shorelines of the island chain. <i>Beachgoers and swimmers should avoid entering the water along ALL windward and Atlantic-exposed shorelines.</i></p>
