SEVERE WEATHER WARNING

The Bahamas Department of Meteorology has issued A Severe Thunderstorm Warning from 12:55 pm until 2:45 pm Monday 13th, October 2025.

A Severe Thunderstorm Warning is in effect for Rum Cay, San Salvador along with their adjacent waters and cays.

A Severe weather watch is in effect across the Central and Southeast Bahamas.

At 12:50 pm lightning detection, observation, radar, and satellite imagery continued to depict a line of moderate showers and embedded thunderstorms moving northeast and eastward toward and across the warning areas. These showers and thunderstorms are associated with a pre-frontal activity ahead of a stationary front across the Northwest Bahamas.

Some of these showers will be locally heavy and thunderstorms will be strong and severe at times causing strong gusty winds, dangerous lightning, heavy downpours, possible hail and or waterspout or tornadic activity. Localized flooding is also possible during these storms.

Boaters in the warning area should seek safe harbor and residents in the warning areas should stay indoors and away from windows when conditions worsen. Residents should not seek shelter under trees or in water as these can become lightning conductors.
